

# AbFlex Ago 1/2/3 antibody (rAb)

Catalog No.: RA9011

## Basic Information

**Molecular weight**

**Category**

Recombinant antibody

**Applications**

IP

**Cross-Reactivity**

Human

## Background

AbFlex antibodies are recombinant antibodies (rAbs) that have been generated using defined DNA sequences to produce highly specific, reproducible antibodies. Each AbFlex antibody contains a 6xHis Tag, a Biotinylation Tag for enzymatic biotin conjugation using the biotin ligase, BirA, and a sortase recognition motif (LPXTG) to attach a variety of labels directly to the antibody including fluorophores, enzymatic substrates (HRP, AP), peptides, drugs as well as solid supports. AbFlex Ago 1/2/3 antibody was expressed as full-length IgG with mouse immunoglobulin heavy and light chains (IgG2a isotype) in mammalian 293 cells. The Argonaute family of proteins (Ago1, Ago2, Ago3 and Ago4) are involved in RNAi mediated gene silencing through siRNA and miRNA effectors. The Argonaute proteins are part of RISC, the RNAi Induced Silencing Complex. Binding of RISC can inhibit mRNA translation and results in the degradation of the mRNA through the action of Ago2-mediated target cleavage. Ago1 is non-essential for siRNA-directed target RNA cleavage but is needed for the production of mature miRNA that affects miRNA-directed RNA cleavage.

## Recommended Dilutions

IP 5 $\mu$ g

## Product Information

<b>Source</b>	Mouse
<b>Isotype</b>	IgG2a
<b>Purification</b>	Protein A Chromatography
<b>Storage buffer</b>	Purified IgG in 140 mM Hepes, pH 7.5, 70 mM NaCl, 32 mM NaOAc, 0.035% sodium azide, 30% glycerol. Sodium azide is highly toxic.

**Storage Conditions** Some products may be shipped at room temperature. This will not affect their stability or performance. Avoid repeated freeze/thaw cycles by aliquoting items into single-use fractions for storage at -20°C for up to 2 years. Keep all reagents on ice when not in storage..

Note: For in vitro research use only, not for diagnostic or therapeutic use, This product is not a medical device.

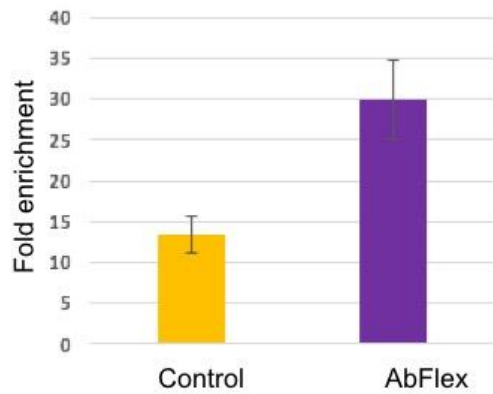

注意:在体外研究使用, 不用于诊断或治疗用途, 本产品不是医疗装置!

AbFlex Ago1/2/3 antibody (rAb) tested antibody tested by immunoprecipitation. Active Motif miRNA IP Kit (Cat. No. 25500) was used with 293 cells (10 million cells per IP). Following IP using AbFlex Ago1/2/3 antibody (5 ug per IP) or a negative control IgG, qRT-PCR was performed on samples using primers for IGF2. Fold enrichment over the negative control IgG shows successful specific IP of IGF2 miRNA associated with the RISC complex.
